

My family and I enjoy listening to XM radio. We listen to it all the time in the car, in the house, at the park and when we are on vacation. It is something we do TOGETHER. I do not see how it is of anyones concern what I as a consumer pay for. Just as I pay for cable, just as I pay for internet access, not all of these services contain "locally oriented" content. So is there a threat in these areas as well? There is much variety in XM and I like it. Let's be real, there are BIGGER issues to be dealing with at this time than this one. I ask that you reject the NAB's petition 04-160.

Signed respectful and loyal XM radio listeners,  
Jeff & Danica Roadman
